EDUCATION

Swami Keshvanand Institute of Technology, Management & Gramothan (SKIT) Jaipur, Rajasthan, India
B. Tech in Computer Science & Engineering | CGPA: 9.65
Sep 2023 – Jun 2027

TECHNICAL SKILLS

Programming Languages: C, C++, Python

Core Concepts: Data Structures and Algorithms, OOP, DBMS, OS, SOLID Principles, LLD (Design Patterns)

Frameworks & Tools: Django, Git, GitHub

Database: MySQL, SQL Server

Web & Security: JWT Authentication & Authorization, CRUD Operations, REST APIs, HTML5, CSS, Bootstrap

WORK EXPERIENCE

CopLur

Data Engineer Trainee

Rajasthan, India

Jun 2025 – Jul 2025

- Processed **2M+ records** using Apache Spark and Databricks with multithreading, improving data processing efficiency by **35%**.
- Automated data preprocessing and generated interactive visualizations using Pandas, NumPy, Matplotlib, and Seaborn to derive actionable insights for decision-making.

KIS Technosoftware

Web Development Intern

Rajasthan, India

Jun 2024 – Jul 2024

- Designed and deployed **6+ responsive web applications** using HTML, CSS, and JavaScript, reducing page load time by **20%** and improving user engagement.
- Implemented secure backend authentication for user login and car booking forms, ensuring data integrity and safe access control.

PROJECTS

- DDR Document Management System** – Python, Django, SQL Server
Led backend development of a secure Document Management System with **Role-Based Access Control (RBAC)** for Admin, Head, and Faculty roles, **JWT-based authentication and authorization**, and folder-level permissions. Reduced unauthorized access risk by **50%** and improved query performance by **30%** MySQL indexing. [GitHub](#)
- SIH Smart Traffic System** – Python, Flask, React, YOLO, Docker, Redis
Engineered an AI-driven adaptive traffic ecosystem deploying YOLO models to process video feeds at 30+ FPS, utilizing a Reinforcement Learning agent that reduced simulated vehicular delays by 22%. [GitHub](#)
- Student Marks Prediction** – Python, scikit-learn, Regression
Developed a machine learning model achieving **98% accuracy** by reducing overfitting through rigorous train-test splitting and hyperparameter tuning using regression algorithms. [GitHub](#)
- Car Dealership Website** – PHP, HTML5, CSS, Bootstrap
Built a full-stack car dealership platform with **CRUD operations** for browsing, booking, and user account management with secure backend authentication. [GitHub](#)

ACHIEVEMENTS

- Finalist at Smart India Hackathon (SIH) with experience across **5+ hackathons**, showcasing strong problem-solving and teamwork skills.
- Secured **1st rank** in GFG DSA Coding Contest at college level and **2nd rank** in the subsequent college-level contest among all students.
- Solved **1200+ DSA problems** across LeetCode (Max Rating: **1781**) and Codeforces (Max Rating: **1328**), focusing on graphs, DP, trees, and advanced data structures.
- Selected among **Top 50 students** across the college for the prestigious “Super 50” batch based on academic performance and technical excellence.

EXTRACURRICULAR ACTIVITIES

- Competitive Programming:** Actively participate in LeetCode Weekly Contests and Codeforces rounds, maintaining a LeetCode rating of **1781** and Codeforces rating of **1328**.
- Robotics Club:** Built a line-following car using Arduino; competed in inter-college robotics competition.
- Certification:** Infosys Springboard online certification.
